BULLETIN

OF THE

CHEMICAL SOCIETY

OF JAPAN

Volume 22

1949

Editor: Toshiyuki Uchimura

Associate Editors:

Hideo Aramaki — Naoji Shikazono
Shoji Makishima — Nobuyuki Tanaka
Noriyuki Sakikawa — Taku Ueshiba
Tadao Shiba — Sakae Yagi

Published by

The Chemical Society of Japan

5, 1-Chome, Surugadai-Kanda, Chiyoda-ku, Tokyo

CONTENTS OF VOLUME 22, 1949.

No. 1.

Yoshiyuki URUSHIBARA and Misao CHUMAN: A New Synthesis of Testosterone. 1

Seizo KANAO: Über die intramolekularen Umlagerung des δ, δ-Diäthyl-γ-amino-δ-valerolactons. 4

Keizo SUZUKI: On the Configuration of Chain Molecules. II. The Effect of Intermolecular Interaction on the Apparent Volume of the Flexible Long-Chain Molecule 8

Kozo HIROTA: The Quantum-Mechanical Treatment of Viscosity Coefficient of Helium by Use of a Rigid Sphere Model with Attractive Force 16

Masayuki NAKAGAKI: Studies on Foams. II. The Foam Formation and the Volume Constraction of Liquid Mixtures 21

Toshio SUDO: General Expressions of the Chemical Compositions of Fine Micas and Chlorites 25

Kazuo KURODA and Yuji YOKOYAMA: On the Equilibrium of the Radioactive Elements in the Hydrosphere. III. On the Ratio of Thorium Emanation to Radium Emanation in the Hydrosphere 34

Kazuo KURODA and Yuji YOKOYAMA: On the Equilibrium of the Radioactive Elements in the Hydrosphere. IV. On the Ratio of Thorium X to Radium in the Hydrosphere 43

No. 2.

Ken SUGAWARA, Shinya OANA and Tadashirô KOYAMA: Separation of the Components of Atmospheric Salt and Their Distribution 47

Masao TOMURA: Studies on the Selenium Barrier Layer Photoelement. V. Photocurrent, Photopotential and Cell Resistance in Relation to the Intensity of Illumination, and Dependence of the Photocurrent and the Phototential on the Temperature . . 52

Yasuo MIYAKE and Yoshio SUGIURA: On the Chemical Compositions of the Eruptives of Volcanoes in New Britain, Pacific Ocean. 57

Osamu SIMAMURA and Makoto TAKAHASI: The Addition of Hydrogen Bromide to Cinnamic Acid and the Oxygen Effect. . . 60

Tsutomu KUWATA, Sin-ichi TOMIYAMA and Masayasu TAKAO: New Diffusion Pump Oil. Higher Monoalkyl-naphthalenes . . 66

Yoshiyuki URUSHIBARA and Misao CHUMAN: The Scission Reactions of the Oxido Ring in Cholesterol Oxides 69

No. 3

Kunihiko KIGOSHI: On the Viscosity of Liquid 75

Masao TOMURA: On the Barrier Layer by the Contact between the Selenium Semiconductor and Metal. II. On the Selenide Formation in the Barrier Layer 82

Haruo SHIBA and Genjiro Hazato: On the Diamagnetism of Perylene. I. 92

Sakae YAGI: Flame Length and its Heat Radiation 97

Yasuo MIYAKE: A New Chemical Method for Measuring the Ultra-violet Ray 105

Réinosouké HARA: Étude sur la précipitation de la protéine par les sels complexes métalliques. I. Précipitation de la protéine par les sels complexes du cobalt. 109

Keizô SUZUKI: The Monolayer of Cresol Resin 114

Taku UÉMURA et Seinosuke MIYAKAWA: Études spectroscopiques des complexes métalliques du diphénylthiocarbazone. I 115

Yoshimasa HIRATA and Koji NAKANISHI: Actinomycin J_2, a By-product from a Strain of Actinomyces. 121

Hideo AKAMATU and Kazutoshi SATÔ: On the Catalytic Decomposition of Carbon Moxide by Iron 127

Yoshiyuki URUSHIBARA: A Stereochemical Representation of the Structures and the Scission Reactions of Cholesterol Oxides. . 132

Ryo SATO and Fujio EGAMI: Studies on Nitrate Reductase. III . 137

No. 4.

Masao TOMURA: Studies on the Selenium Barrier Layer Photoelement. VI. Abnormal Spectral Sensibility of a Selenium Barrier Layer Photoelement 145

Kazuo KURODA: On the Equilibrium of the Radioactive Elements in the Hydrosphere. V. A Simple Method for Distinguishing Uranium and Tnorium in Radioactive Minerals 149

Genjiro HAZATO: On the Diamagnetism of Perylene. II 151

Yukio MURAKAMI: A New Method of the Colorimetric Determination of Small Amounts of Manganese with Silver Peroixide . 157

Keizô SUZUKI: The Theory of the Rubber-like Elasticity in Monolayers 165

Mototaro SUZUKI: Über den Reaktionsmechanismus der Dianthracenbildung aus Anthracen. II 172

Réinosouké HARA: Étude biochimique sur les éléments des terres rares. I. Sur la distribution du néodyme dans les viscères . . 179

Tsutomu KUWATA and Tadahisa NAKAZAWA: The Reaction of Aluminium Sulfate and Calcium Carbonate. I. Preparation of Basic Aluminium Sulfate Sol and its Hydrolysis 182

No. 5.

Nobuyuki TANAKA and Reita TAMAMUSHI: Fundamental Studies on the Current Voltage Curve in Polorography. I. Derivation of the Diffusion-Controlled Polarographic Waves of Simple Metal Ions from the Standpoint of Chemical Kinetics 187

Réinosouké HARA: Étude biochimique sur les éléments des terres rares. II. Sur l'absorption du néodyme dans le corps animal. 194

Taichi HARADA: Fungus and Enzyme. Preparation of Aspergillus Oryzae Amylase 197

Masayuki NAKAGAKI: Studies on Foams. III. The Foam Formation of Some Dyestuff Solutions 200

Kazuo KURODA: On the Equilibrium of the Radioactive Elements in the Hydrosphere. IV. Radioactivity Measurement of Natural Waters with the Geiger-Müller Counter 203

Yukio MURAKAMI: A New Method of Determination of Thallium with Cobalt Hexammine Trichloride 206

San-ichiro MIZUSHIMA, Shizuo NAKAMURA and Tsuneo TOBIYAMA: Analysis of Straight-Run Gasolines by Means of Raman Effect 213

Masamichi TSUBOI: On the Molecular Association in Amides as Revealed by Their Near-Infrared Absorption Spectra 215

No. 6.

Réinosouké HARA: Étude biochimique sur les éléments des terres rares. III. Sur la reaction entre la protéine et les sels du néodyme 225

Reita TAMAMUSHI and Nobuyuki TANAKA: Fundamental Studies on the Current-Voltage Curve in Polarography. II. Derivation of the Activiation-Controlled Polarographic Waves of Simple Metal Ions from the Stand-Point of Chemical Kinetics 227

Yukio MURAKAMI: The Determination of Thallium in Flue-Dust and Lead Chamber Muds 236

Hidetake KAKIHANA: Inorganic and Analytical Chemistry Using Ion-Exchange Resin. I. Vanadium Ion Exchange in Cation Exchange Resin Column 242

Yataro OBATA and Tei YAMANISHI: The Sunflavor of Beer, II. Essential Substance of Sunflavor 247

Eiji HASE, Yoshihisa MIZUNO and Masujiro KATAYANAGI: Inhibitory Effect of Cyanine-and Styryl-Dyes upon Cholinesterase. I 250

Masamichi TSUBOI: On the Configurations of the Peptide Linkage in Proteins and Some Other Substances, as Revealed by Their Near-Infrared Absorption Spectra. 255

Kakuji GOTO and Kimiyo MICHI: Studies on Sinomenine. LXI. On (+)-epi-Dihydro-thebainone. 262

Yukio YONEDA: Fundamental Research on Anodic Reaction. II. Activiation Energy of Anodic Oxygen-Producing Reaction on Some Electrode Materials in Aqueous Solution of N/10 Sodium Hydroxide 266

Yoshiyuki URUSHIBARA and Misao CHUMAN: The Configuration of Δ^5-Cholestenone Oxides 273
